

# Multiple Developments for Geospatial Services Company

## PROJECT DETAILS

 Custom Software Development

 Jul 2018 - Ongoing

 Confidential

*"The quality is very good so far."*

## PROJECT SUMMARY

clevert works on a range of development projects, supplementing the resources of a software development unit. They use Angular, Ionic, and Java as well as database technologies.

## PROJECT FEEDBACK

The ongoing collaboration has already produced good results, allowing the team to scale their work and set up new projects that would have been beyond their scope. They communicate well and ensure that effective solutions are found when issues arise.

## The Client

Introduce your business and what you do there.

Our company deals with spatial information, with quite a diverse project portfolio, mainly working for public clients. I'm the head of the software development unit.

 Project Manager,  
Geospatial Services  
Company

 Munich, Germany

## The Challenge

### What

We wanted to be more flexible in our response to our projects. It was difficult to find competent professionals to help with these tasks, so we were looking for a partner that would allow us to be more flexible and able to scale.

### CLIENT RATING

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

## The Approach

### What was the scope of their involvement?

They work with us using web and mobile technologies, including Angular, Ionic, and Java, and we also use database technologies. Our upcoming projects will include Python.

### What is

So far, we've worked with five developers from their team, and there are three more joining us this month.

### How did you come to work with

I found them through their web page and contacted them. I was in contact with several companies, and cleverti were the best fit for us and our goals.

### What is the status of this engagement?

We started working with them in July 2018, and it's ongoing.

## The Outcome

### What evidence can you share that demonstrates the impact of the engagement?

They've allowed us to start some projects we wouldn't have otherwise been able to, providing us with solutions to scale some and set up others. The quality is very good so far. We have the same way of thinking about our work and what should be accomplished, which means the teamwork is excellent. They're crucial for the work we do.

## How did

Communication is really good. We've set up mixed teams with clevert, divided between Munich and their office, and we have a manager on their side, who's not directly involved in the work. If there are any issues, they provide us with the help we need.

## What did you find most impressive about them?

They have useful resources, which are difficult to find in our location. Communication and management are very good, as is the overall collaboration. We think the same way, and they do everything to find solutions for us. Our teams work well together.

## Are there any areas they could improve?

I don't see anything in this regard. There can always be improvements during a project, but we work on them together.

## Do you have any advice for future clients of theirs?

No, I can't name anything specific.
